

USG Series UltraSafe™ fuseholders with spring terminal technology

Multi-Pole Assembly Kits

Catalog Number: USPTH

USPTH multi-pole assembly kits allow the user to assemble multiple poles in the field. (2) plastic snap pins and (1) brass rod are required to assemble two poles together. When ordering catalog number USPTH, you will receive (1) bag with enough hardware to assemble 12-poles (includes 24 snap pins, 12 brass rods).

WMB Marker System

Catalog Number: USWMB0

Blank markers, 10x10 strips

Catalog Number: USWMB1

Pre-marked 1-10, x10 strips

WMB markers can be snapped directly into the WMB marker receptacle which is a standard feature on all USG fuseholders. No additional adapters are required. Order catalog number USWMB0 to receive (100) blank markers which can be marked in the field by the user. Order catalog number USWMB1 to receive (100) pre-marked markers, 10 strips, pre-marked 1-10.

Continuous Marker System

Catalog Number: USCMA

Continuous marking strip adapter

Catalog Number: USCM0

Blank markers, 10x10 strips

Catalog Number: USCM1

Pre-marked 1-10, x10 strips

Continuous marking strips must be used with the USCMA continuous marking strip adapter. (1) USCMA is needed per pole. Order catalog number USCMA to receive (1) bag of (25) USCMA adapters. Order catalog number USCM0 to receive (100) blank markers, 10 strips of 10 blank. Order catalog number USCM1 to receive (100) pre-marked markers, 10 strips, pre-marked 1-10.

Test Plug

Catalog Number: USTP

The USTP is used to check if voltage is present at the fuseholder terminal when used with a voltmeter. The USTP plugs easily into the test plug receptacle located directly below the terminal lever. Order (1) USTP to receive one test plug.
