SURGE SUPPRESSION FUSES

Ferraz Shawmut surge suppression fuses are specially designed to address the protection of TVSS systems. The surge suppression fuses have been specially designed to withstand 8x20 μ Sec surge pulses without opening, allowing the TVSS system to react to the surge. All surge suppression fuses have a 8x20 μ Sec surge rating, not a continuous current rating. Under AC short circuit conditions these surge suppression fuses are very current limiting.

Features/Benefits
